

I find it hard believe that that the FCC and Congress see this as an important issue. I pay for XM radio and enjoy there servicers daily. The traffic and weather they provide has become a mojour part of my day to day business. I do not listen to FM any more. I have made a choice to pay for this information, and I feel that you are infringing on my personal right to make this choice. Leave XM alone, and let us keep enjoying what we pay for.
